

LOW PROFILE (TAPERED) ATTIC VENTS

For all types of Shingle, Shake and Slate Roofs

Shingle Over Finish Applied by Installer

UPGRADES?

NET FREE VENTILATION AREA

1/4" Wire Mesh	72.00 sq. in.
1/8" Wire Mesh	64.80 sq. in.

Figures based on independent evaluation reports.

FEATURES

26 Gauge G90 Galvanized Steel

20 Year Warranty

1/4" Noncombustible, Corrosion-Resistant Wire Mesh

4" Flange

METAL UPGRADE OPTIONS

 .032" Aluminum, 50 Year Warranty

 16 oz. Copper, 50 Year Warranty

FINISH UPGRADE OPTIONS

Pre-Painted Galvanized Steel/Aluminum Finishes

BLACK BRONZE BROWN CHARCOAL GRAY WHITE

Colors may vary between lots.

CLIMATE-RESISTANT UPGRADE OPTIONS

Stainless Steel or 1/8" Noncombustible, Corrosion-Resistant Wire Mesh

Patented Stainless Steel Fine/Flexible Wire Filament

High Wind Diverter

Integrated External Diverter

Z-Baffles (Snow Load)

Recommended in areas where Ice Barriers are required (IRC 905.1.2).

PATENTED
DESIGN INSTALLS
BELOW SOLAR
PANELS

O'Hagin vents are manufactured and protected under one or more of the following patents (other U.S. and foreign patents are pending): D456,531; D457,234; D458,391; D458,392; D469,889; D479,885; D504,172; D512,774; D549,316; 6,050,039; 6,129,628; 6,354,051; 6,390,914; 6,447,390; 6,491,579; 9,011,221

O'HAGIN VENTS
EXCEED INDUSTRY
PERFORMANCE
STANDARDS

CLIMATE-RESISTANT ATTIC VENTS

FLAME • EMBER • SNOW • RAIN

TESTED to 140 mph wind-driven rain (category 4 hurricane).
PASSED: Wind-driven rain tested for 75 feet—five plus stories.

TESTED to meet the specific requirements of Chapter 7A of the California Building Code for flame and ember exposure.

PASSED: NO cotton ignition.

FIRE & ICE **WEATHER MASTER**

Brands and Trademarks may vary by region.

LOCAL AND NATIONAL APPROVALS

O'Hagin is a recognized leader in attic ventilation testing and design.

RECOGNITION

This product is qualified for use as a component of a FORTIFIED™-eligible and Wildfire Prepared Home™-eligible roof system. Use of this product does not guarantee a FORTIFIED™ and/or Wildfire Prepared Home™ designation. To be eligible for a FORTIFIED™ designation, a complete roofing system (components and accessories) must meet the requirements detailed in the FORTIFIED™ and be installed by a certified FORTIFIED™ Roofing Contractor. WILDFIRE PREPARED Home™ designation requires the entire structure—including all components and accessories—Wildfire Prepared Home™ Standard Wildfire Prepared Home™ Standard Products that are required to meet the standard include but may not be limited to: roof coverings, attic ventilation components, a qualified sealed roof deck system, roof underlayment, edge metal and appropriate fasteners for all mechanically fastened components. Documentation for all products and their installation is required. Additional requirements, eligibility criteria and restrictions apply. See the current FORTIFIED™ standard at <https://fortifiedhome.org/technical-documents/> and the current Wildfire Prepared Home™ standard at <https://wildfireprepared.org> for details.

BENEFITS OF ATTIC VENTILATION

INSTALLING A CODE-REQUIRED BALANCED VENTILATION SYSTEM CREATES SUPERIOR AIR MOVEMENT

Benefits:

1. Extends the life of your roof by lowering temps in warmer months and removing moisture in cooler months.
2. Enhances curb appeal with shingle-over installation.
3. Secures maximum efficiency through a balanced design.
(50% High/Exhaust and 50% Low/Intake)
4. Patented design installs below solar panels.
5. Shingle manufacturers warranties require compliance with attic ventilation codes such as the IRC & IBC.
6. Promotes a healthy home, reduces moisture and trapped gases to improve indoor air quality.
7. Conserves energy by naturally introducing ambient air into the attic while exhausting stagnant air.

CUSTOMER FEEDBACK

“There is never time to do it right, but there's always time to do it over. Once we switched to O'Hagin, our callback rate fell through the floor. Installing the best product on the market really made a difference.”

— ROOFING CONTRACTOR

“Less is more except when it comes to \$\$\$ (money). We primarily install O'Hagin because it is easier, more efficient, produces fewer hassles and is ultimately much more profitable.”

— ROOFING CONTRACTOR

“The right answers pay. Literally. We dramatically increased our sales by incorporating an O'Hagin Attic Ventilation Analysis with every proposal.”

— ROOFING CONTRACTOR

CODE APPLIED: International Residential Code (2024), Chapter 8 Roof Ceiling Construction, 803.6 Roof Ventilation (Page 448) & International Wildland Urban Interface Code (2024), Chapter 5 Special Building Construction Regulations, Section 504 & 505 Ignition-Resistant Construction (Page 30-32)

KEY RESOURCES:

Have the attic vent layout and calculations you requested!
We've created an easy to follow attic ventilation plan.
Some guidelines to keep in mind:

- Our work is only as good as the information provided – check with your local code official before starting any work – and use an industry professional to install all products.
- Use only O'Hagin Attic Ventilation Products for your project's attic ventilation requirements – O'Hagin Attic Vents are designed for use as both INTAKE and EXHAUST vents – using other types of attic ventilation products may result in an "unbalanced" ventilation system and the potential for a reduction in results.
- For specific information regarding high fire danger or Wildland Urban Interface (WUI) zone, visit www.wildfirelink.org
- For specific installation requirements, complete installation instructions, warranty information and more, visit our website at www.ohagin.com

We value our thoughtful partnership and take pride in being part of your project.

Thank you!
