RECOGNITION

This product is qualified for use as a component of a FORTIFIED™-eligible and Wildfire Prepared Home™-eligible roof system. Use of this product does not guarantee a FORTIFIED™ and/or Wildfire Prepared Home™ designation. To be eligible for a FORTIFIED™ designation, a complete roofing system (components and accessories) must meet the requirements detailed in the FORTIFIED™ and be installed by a certified FORTIFIED™ Roofing Contractor. WILDFIRE PREPARED Home™ designation requires the entire structure—including all components and accessories—Wildfire Prepared Home™ Standard Wildfire Prepared Home™ Standard Products that are required to meet the standard include but may not be limited to: roof coverings, attic ventilation components, a qualified sealed roof deck system, roof underlayment, edge metal and appropriate fasteners for all mechanically fastened components. Documentation for all products and their installation is required. Additional requirements, eligibility criteria and restrictions apply. See the current FORTIFIED™ standard at <https://fortifiedhome.org/technical-documents/> and the current Wildfire Prepared Home™ standard at <https://wildfireprepared.org> for details.

BENEFITS OF ATTIC VENTILATION

INSTALLING A CODE-REQUIRED BALANCED VENTILATION SYSTEM CREATES SUPERIOR AIR MOVEMENT

Benefits:

1. Extends the life of your roof by lowering temps in warmer months and removing moisture in cooler months.
2. Enhances curb appeal with shingle-over installation.
3. Secures maximum efficiency through a balanced design.
(50% High/Exhaust and 50% Low/Intake)
4. Patented design installs below solar panels.
5. Shingle manufacturers warranties require compliance with attic ventilation codes such as the IRC & IBC.
6. Promotes a healthy home, reduces moisture and trapped gases to improve indoor air quality.
7. Conserves energy by naturally introducing ambient air into the attic while exhausting stagnant air.

KEY RESOURCES:

Here's the attic vent layout and calculations you requested!

We've created an easy to follow attic ventilation plan.

Some guidelines to keep in mind:

Our work is only as good as the information provided - check with your local code official before starting any work - and use an industry professional to install all products.

Use only O'Hagin Attic Ventilation Products for your project's attic ventilation requirements - O'Hagin Attic Vents are designed for use as both INTAKE and EXHAUST vents - using other types of attic ventilation products may result in an "unbalanced" ventilation system and the potential for a reduction in results.

For specific information regarding high-fire danger or Wildland Urban Interface (WUI) zone, visit www.wildfirelink.org

For specific installation requirements, complete installation instructions, warranty information and more, visit our website at www.ohagin.com

We value our thought partnership and take pride in being part of your project.

Thank you!

CUSTOMER FEEDBACK

“When the WUI Code changed – eliminating combustible plastic vents – we were thrilled to discover O'Hagin's new Pitch Perfect vent. It is everything you expect from an O'Hagin. Superior design. Contractor-grade construction. Hassle free. It instantly became our go to ridge vent.”
- ROOFING CONTRACTOR

“I probably installed 10,000 plastic vents. After installing one O'Hagin Pitch Perfect vent, I'll never install a plastic vent again. This vent is just so much better.”
- ROOFING CONTRACTOR

“O'Hagin focuses on the details. You can tell they thoroughly tested this vent. It's a huge step forward in ventilation technology. A single metal vent that works on different roof pitches is exactly what we needed. Long overdue, but absolutely worth the wait. As always, O'Hagin does it right.”
